What The Admin Panel Does

- Lets admins update website content from a protected panel.
- Lets admins edit text, links, images, SEO fields, page sections, buttons, and labels.
- Keeps the website design, layout, alignment, typography, and formatting fixed.
- Stores contact form enquiries in the connected database.
- Lets admins review submitted enquiries from the admin panel.

1. Login To The Admin Panel

Open <https://radiantconsultant.com/admin>. If you are not logged in, the website will show the sign-in screen.

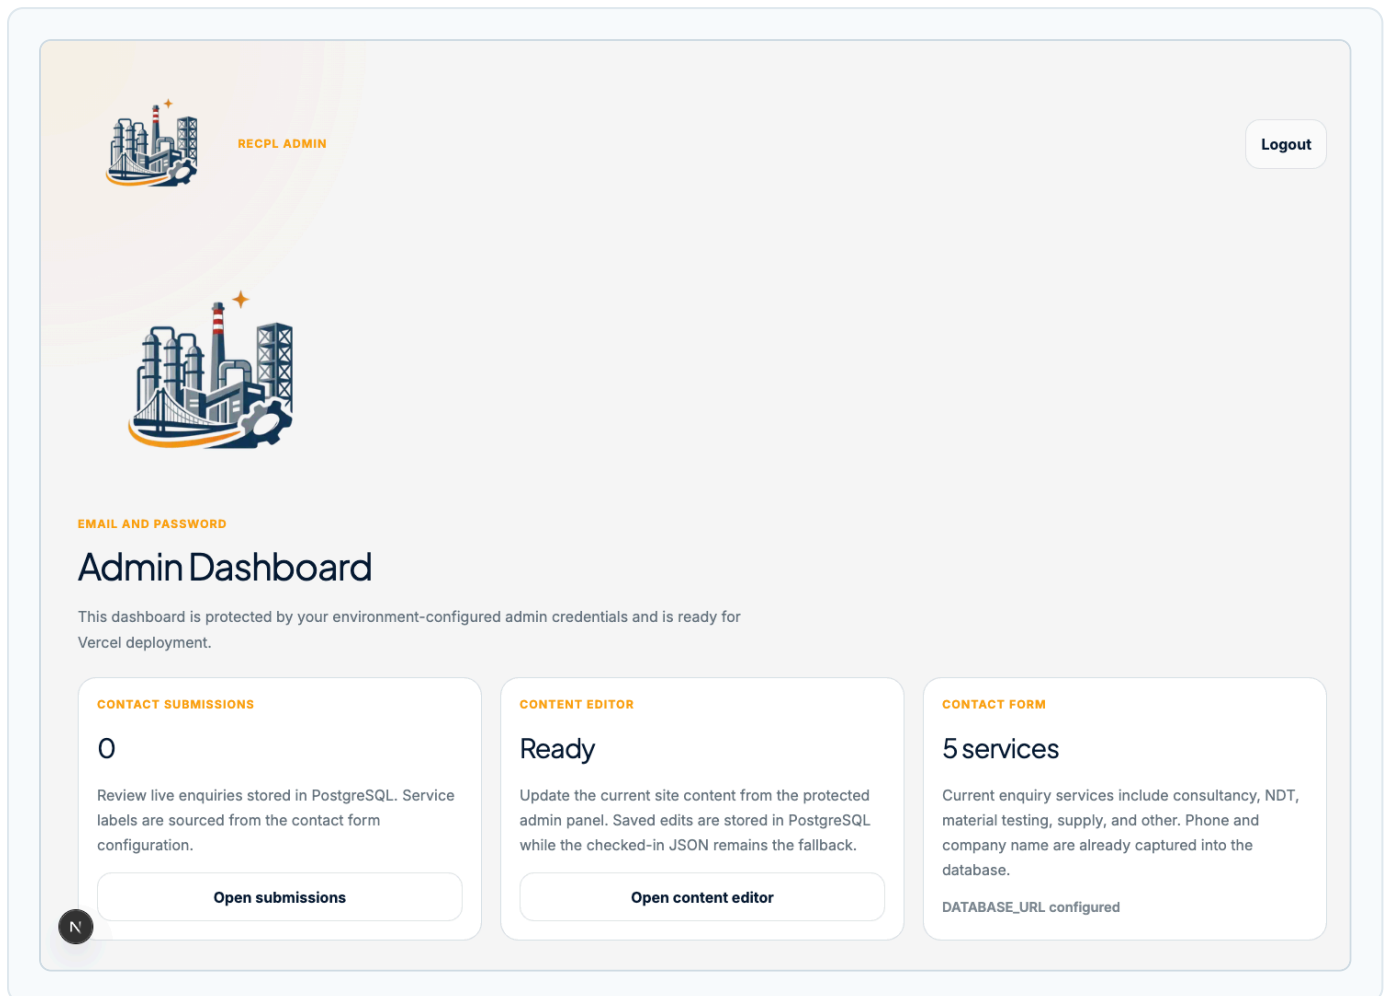

A screenshot of the RECPL Admin Sign in screen. The screen features a central white card with a light blue gradient background. At the top of the card is an illustration of an industrial facility with a bridge and a gear. Below the illustration, the text "RECPL ADMIN" is displayed in orange, followed by "Sign in" in a large, bold, black font. A subtitle reads: "Use your configured admin email and password to access the protected dashboard." There are two input fields: "Email" with the placeholder "admin@example.com" and "Password" with the placeholder "Enter password". A dark blue "Login" button is positioned at the bottom of the card. In the bottom left corner of the overall screen, there is a small circular icon with a white 'N' on a dark background.

Pointers:

- Enter the admin email ID in the **Email** field.
- Enter the admin password in the **Password** field.
- Click **Login** to open the admin dashboard.
- If login fails, check that the email and password are typed exactly.

2. Understand The Admin Dashboard

After login, the dashboard shows the main admin areas.

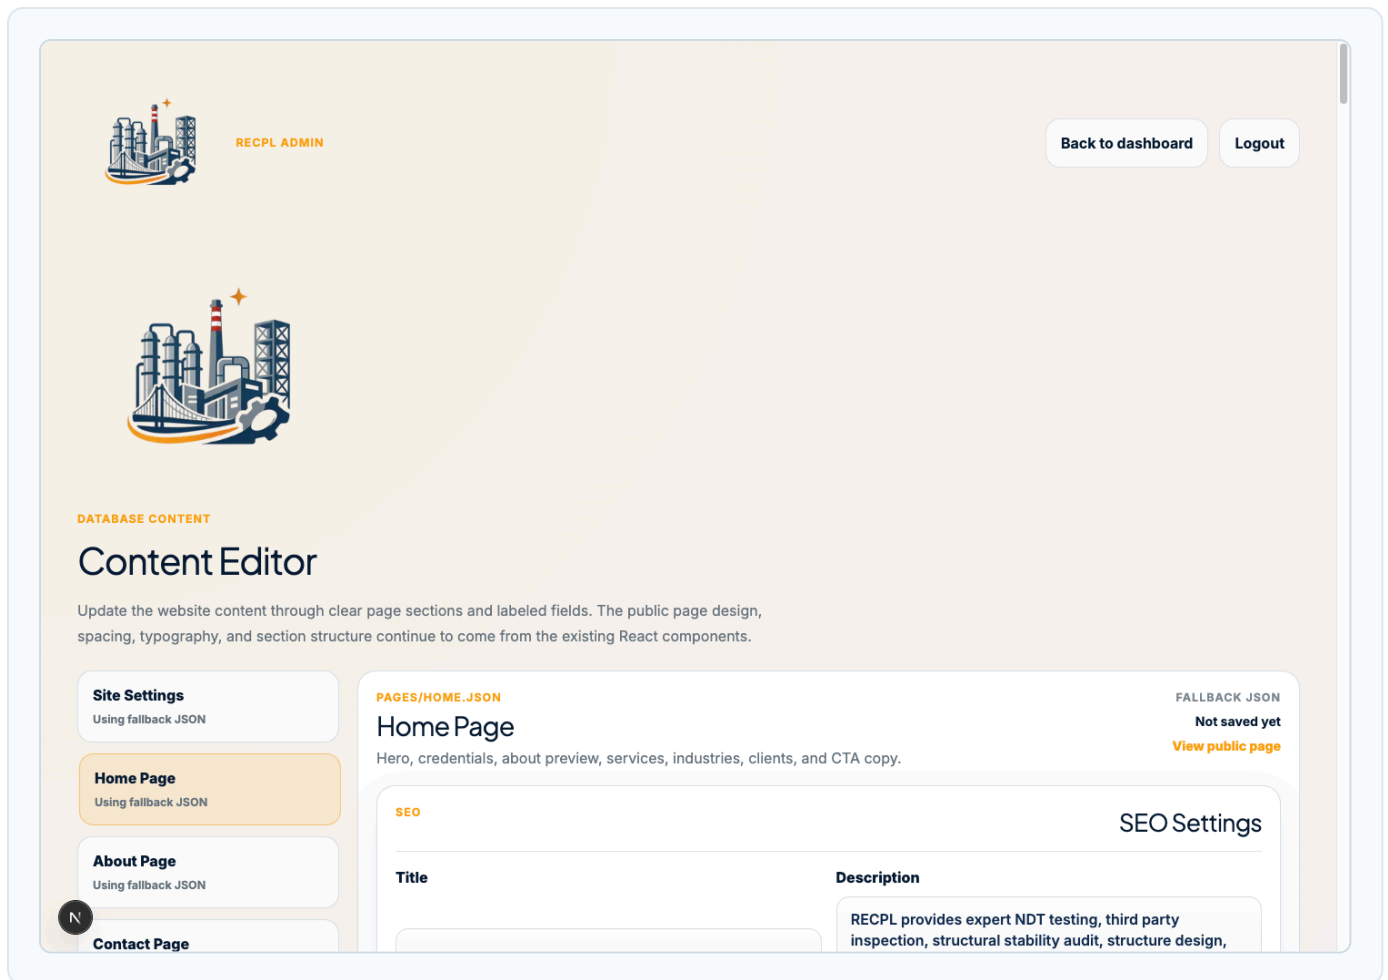

Pointers:

- **Contact Submissions** opens the enquiry list received from the contact form.
- **Content Editor** opens the website content editing area.
- **Contact Form** shows whether the database is connected and how many service options are configured.
- Use **Logout** after finishing admin work.

3. Open The Content Editor

Click **Open content editor** from the dashboard, or open <https://radiantconsultant.com/admin/content>.

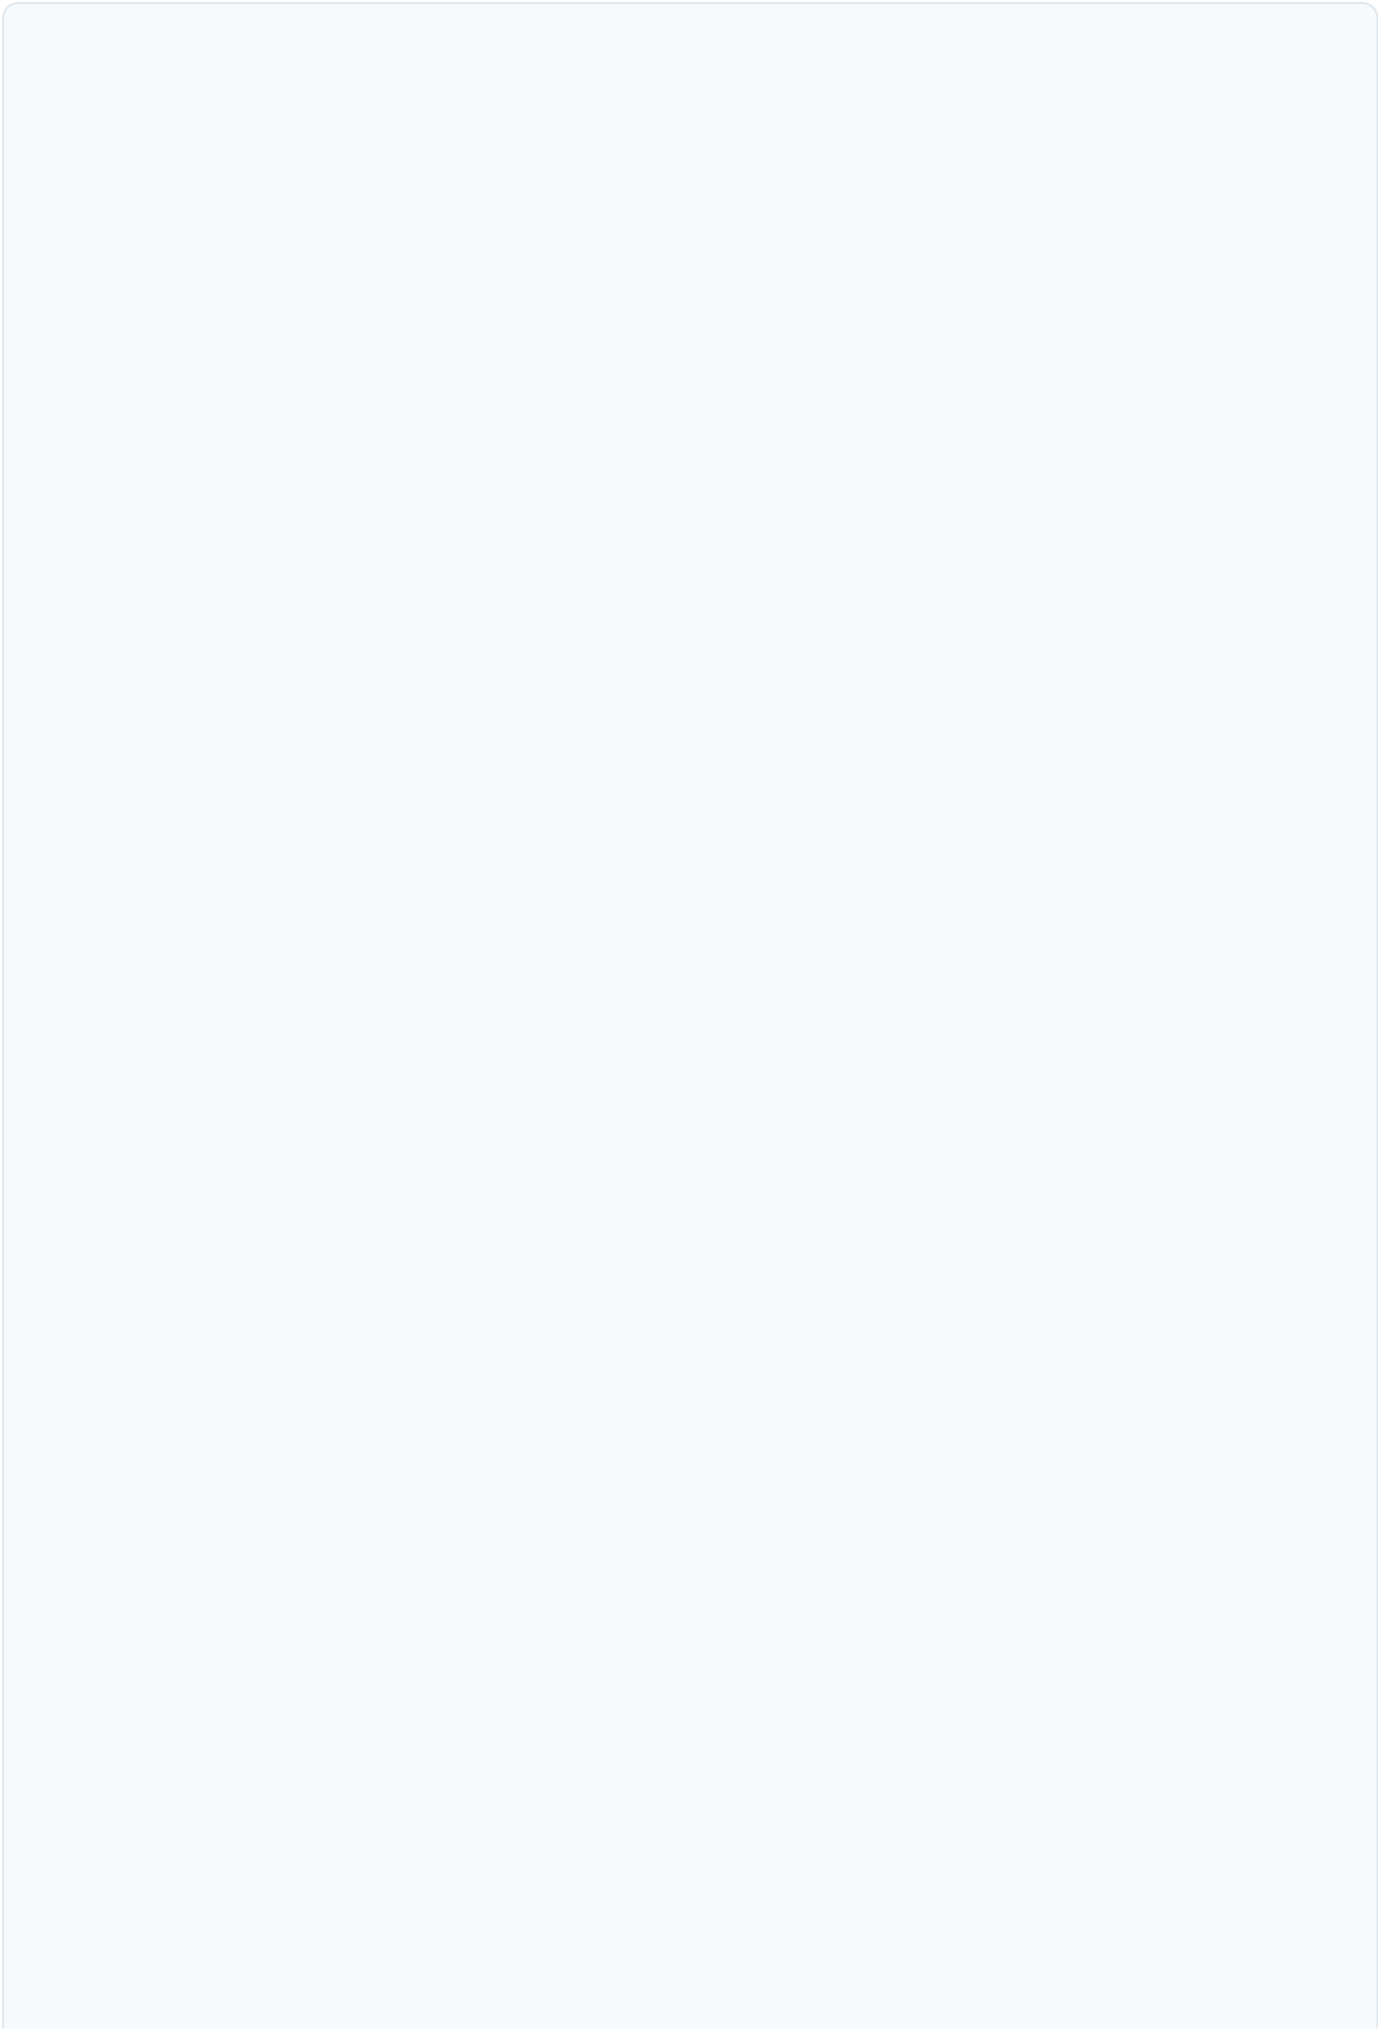

Pointers:

- The left side lists the editable website areas.
- Select a page such as **Home Page**, **About Page**, **Contact Page**, **Gallery**, or **Site Settings**.
- The right side shows editable sections and fields for the selected page.
- **Using fallback JSON** means the page is still using the original website content until an admin saves changes.

4. Update Website Content

Each page is split into clear sections such as SEO Settings, Hero Section, Services, Industries, Clients, CTA, and similar page-specific groups.

Home Page

Hero, credentials, about preview, services, industries, clients, and CTA copy.

SEO

SEO Settings

Title	Description

Pointers:

- Wait for the saved message before leaving the page.
- Click **View public page** to check the updated page.
- Review the public page for spelling, image quality, and link correctness.
- If something looks wrong, return to the same admin page, fix the field, and save again.

6. Review Contact Form Submissions

Open <https://radiantconsultant.com/admin/submissions>, or click **Open submissions** from the dashboard.

Pointers:

- Each enquiry card shows the visitor name, selected service, email, phone, company, source page, and message.
- Use the email and phone details to follow up with the visitor.
- New submissions appear after visitors send the public contact form.

- If no enquiries are available, the page will show an empty-state message.

7. Logout

Click **Logout** from the top-right area of the admin panel.

Pointers:

- Logout after every admin session.
- Do not leave the admin panel open on a shared computer.
- Log in again only when you need to update content or review enquiries.

Quick Admin Checklist

- Open the correct website page from the table at the top.
- Login to the admin panel.
- Choose **Content Editor** for website updates.
- Choose **Contact Submissions** for enquiries.
- Save content changes and verify the public page.
- Logout after finishing.
